Sometimes Make Balance **Empties waste** collection routes small between containers are not efficient decisions collection manually or since some circuits are machanically containers are Follow different empty specific DO collection THINK routes Reports Want to complete Some incidents the collection containers check the found during circuit the fastest and vehicles onboard the collection way possible stops are not vehicle process precise computer **SMART WASTE MANAGEMENT SYSTEM** (WASTE PICKER) Spend too much Over-whelmed time in traffic, Pride for with the amount delaying There should contributing of work and collection time be a better way to the working frames to reduction of schedule communicate waste SAY with the FEEL There are command several centre Frustrated with containers that some citizens Empowered are difficult to that don't take when given access Some items are not being waste collection new tools to separated properly

WCS system routes are time consuming

> Not being sure about containers stops

People not understanding the importance of segregating waste

Not knowing what containers are empty or full

work

More efficient collection routes

More balanced work and personal life

**NEEDS** 

**PAINS** 

seriously

Usage of new technologies and techniques to help the collection

Help reduce waste and pollution
